

NeoConsult – AI & Data Consulting Services

About NeoConsult:

NeoConsult is a Bangalore-based AI and Data Engineering company that helps businesses accelerate their digital transformation.

We specialize in delivering customized machine learning, data analytics, and AI-driven automation solutions.

Our mission is to bridge the gap between business needs and data intelligence — empowering organizations to make faster, data-backed decisions.

Core Service Areas:

1. AI & Machine Learning Solutions

We build and deploy predictive models, recommendation systems, and generative AI applications.

Our expertise covers:

- Time Series Forecasting (Demand, Sales, or Inventory)
- NLP Chatbots and Document Intelligence
- Computer Vision for Quality Inspection
- Generative AI for Marketing & Content Creation

2. Data Engineering & Pipelines

We design end-to-end data pipelines and implement cloud data platforms for seamless analytics.

Services include:

- Data ingestion and transformation (ETL/ELT)
- Cloud Data Warehousing (Snowflake, BigQuery, Azure Synapse)
- Data Quality and Governance Frameworks
- Real-time Streaming Data Solutions

3. Business Intelligence & Visualization

We transform raw data into insights using intuitive dashboards.

Our BI offerings include:

- Power BI and Tableau dashboards
- KPI automation and performance tracking
- Self-service analytics for business teams

4. GenAI & LLM Integration

NeoConsult integrates cutting-edge Large Language Models (LLMs) into enterprise workflows.

We provide:

- RAG-based knowledge assistants
- Internal AI copilots for teams
- Custom GPTs trained on private data

Project Consultation & Engagement Models:

We offer **free 30-minute project consultations** to understand client needs and recommend tailored solutions.

Our engagement options include:

- Proof of Concept (POC)
- Pilot Project
- Long-term Managed AI Service

Booking a Consultation:

Clients can schedule a project consultation directly through our **AI Booking Assistant**, available 24/7 via our website or NeoStats use case demo.

Industries We Serve:

- Finance & Banking
- Retail & E-Commerce
- Healthcare & Life Sciences
- Manufacturing
- Telecommunications
- Education & Research

Our Technology Stack:

Languages: Python, SQL, JavaScript

Libraries: Scikit-learn, TensorFlow, PyTorch, LangChain

Databases: PostgreSQL, MongoDB, Snowflake

Cloud Platforms: AWS, Azure, GCP

Visualization: Power BI, Tableau, Streamlit

Why Choose NeoConsult?

- Proven expertise across AI and Data projects
- End-to-end model development and deployment
- Dedicated research team for Generative AI
- Transparent pricing and agile delivery
- 100% data security and compliance
